Cross Banner Assembly Instructions

- 1. Assemble Tripod Base** - Open up the case, remove the tripod base, open up the base and set aside.
- 2. Insert Frame Poles** - Remove the 2 frame poles, then insert into the 2 holes at the top of the tripod base.
- 3. Mount Media** - Unscrew the bottom 2 mounting bolts near the base of the tripod base to give room for the banner's bottom grommets to fit over them. Insert the banner's bottom grommets over the bolts, then do the same for the top 2 mounting bolts at the ends of the frame poles.
- 4. Tighten Media** - Tighten all 4 mounting bolts as necessary.

3dASAP first introduced affordable templated retractable banners in 2007. To date, 3dASAP remains the best source for local nonprofit sites to easily create all types of display products.

All 3dASAP products are available to be customized by any organization. Sponsors and supporters are part of our extended nonprofit service; we are always HAPPY to help.
